Mission Statement

- The mission of the SB 123 Program is to ensure public safety while effectively addressing prison recidivism by providing community-based substance abuse treatment to targeted, non-violent, drug offenders having substance abuse disorders.
SB 123 was approved during the 2003 Legislative session and implemented in FY 2004, with the goal of treating non-violent drug offenders and reserving prison sentences for those offenders who commit serious, violent crimes.

The program provides funding to eligible offenders for community-based substance abuse treatment.

The program is maintained through coordinated efforts among the Kansas Sentencing Commission, Community Corrections, Court Services, and treatment providers.

Eligibility

- **Big New for Small Sales**
  - SB 18 Expanded Eligibility to Level 4 Distribution
  - "The bill expands eligibility for the nonprison sanction of placement in a certified drug abuse treatment program to include offenders convicted of a controlled substance cultivation or distribution offense that falls within existing severity level and criminal history categories eligible for such treatment for controlled substance possession offenses. These categories include drug severity level 5 offenses without certain previous convictions and drug severity level 4 offenses with a criminal history score of E or lower without certain previous convictions. [Note: Under continuing law, Kansas’ sentencing guidelines for drug crimes utilize a grid containing the crime severity level (1 to 5, 1 being the highest severity level) and the offender’s criminal history score (A to I, A being the highest criminal history score) to determine the presumptive sentence for an offense. There is no current cultivation or distribution offense with drug severity level 5. An offender is classified as criminal history level E if the offender has at least three nonperson felonies, but no person felonies.] These provisions take effect July 1, 2019."
